

## UZH IncubatorLab - A co-working lab space for UZH Entrepreneur-Fellows in MedTech

With the UZH Entrepreneur-Fellowship in BioTech and MedTech, the University of Zurich (UZH) provides funding, advice, and support to young researchers in life sciences and related fields who intend to start up a company based on their own research carried out at UZH.

UZH Entrepreneur Fellows are given the opportunity to further develop their technology, product or novel service and to evaluate the potential for the commercialization of such a technology, product or service before founding the company.

Complementing this financial support, UZH - **sponsored by the Werner Siemens Stiftung** - provides its Entrepreneur Fellows access to world-class research infrastructure in the **UZH IncubatorLab**; a lab space hosted by the Institute for Regenerative Medicine • IREM, at Campus Schlieren.

### What does the UZH IncubatorLab offer?

The UZH IncubatorLab offers the **state-of-the-art laboratory infrastructure** necessary for Entrepreneur Fellows to work independently on the advancement of their research and develop a marketable business idea.

Furthermore, Entrepreneur Fellows can benefit from **services** such 3D-printing facilities and **expertise**, as well as access to and **training** in a certified quality management system (QMS) according to ISO 13485 standards required in Medical Device development.

Finally, the UZH IncubatorLab offers an invaluable exchange with the **entrepreneurial community** at UZH's Institute for Regenerative Medicine • IREM and Bio-Technopark Schlieren. On this campus, over 45 companies, ranging from young start-ups to globally active companies and academic institutions in the life sciences work towards developing better products and services for patients. This ideal ecosystem promotes the advancement of the UZH Entrepreneur Fellows' projects towards the establishment of their spin-off companies.

### Who can join the UZH IncubatorLab?

Selected UZH Entrepreneur Fellows can participate in the UZH IncubatorLab for the duration of their Entrepreneur-Fellowship, e.g. for up to 18 months. The framework conditions are laid down in the UZH agreement.

### Location of the UZH IncubatorLab

The UZH IncubatorLab is located at UZH's Institute for Regenerative Medicine • IREM, Campus Schlieren (Wagistrasse 12 - 7<sup>th</sup> floor, 8952 Schlieren).
